FOR IMMEDIATE RELEASE

The D.S. Brown Company Launches New User Friendly Exodermic™ Bridge Deck Website

North Baltimore, OH, April 18, 2011 – [The D.S. Brown Company](#), patent holder for the Exodermic™ Bridge Deck system, has released a new user friendly website for this modular and lightweight deck system – www.exodermic.com.

Headquartered in North Baltimore, Ohio, D.S. Brown is a leading designer, supplier and manufacturer of engineered products for the bridge and highway industry. In addition to supplying its core products, D.S. Brown is also the patent holder and an information source for the Exodermic™ bridge deck system - providing design aids, suggested specifications, informational materials, and technical assistance to bridge engineers, owners, and contractors. The steel grid portion of an Exodermic™ deck is available from multiple licensed™ suppliers.

According to Mark Kaczinski, Vice President of Engineering at D.S. Brown, “The new website provides easy navigation to users looking for details, specifications, or general information about the Exodermic™ Bridge Deck system. In addition to the new website being a great source of information for bridge engineers and bridge owners, the website also includes a “Contact Us” section providing an easy gateway for users with project specific inquiries.”
